# APICS – Certified Supply Chain Professional Certification Preparation Course

---

## **Course No. 237**

The APICS Certified Supply Chain Professional (CSCP) program is the first and only supply chain certification that encompasses the end-to-end global supply chain (GSC), providing participants with the skills to effectively manage those activities that involve suppliers, plants, distributors, and customers located around the world. This course is designed to prepare attendees for APICS CSCP certification and covers all the required areas of the body of knowledge, as specified by APICS. Attendees will enhance their supply chain competency, enabling both professionals and employers by keeping organizations more competitive in today's economy.

## **Course Benefits**

Student will be able to examine and execute supply chain-related processes including forecasting, demand management, scheduling, master planning, supplier certification, communications, and managing customer expectations.

## **Prerequisites**

None

## **Technology or Equipment Required**

Access to use of computer and internet. All courses are instructor-driven and provided via online or in-person.

## **Duration**

Five Days

## **Learning Objectives**

1. Upon completion of the course, students will be able to:
2. Assess internal operations for:
3. Inventory Management
4. Logistic management
5. Supply chain risk
6. Develop optimization plan
7. Apply GS strategies for products and services to benefit the use of global suppliers
8. Evaluate GS network and develop an improvement plan
9. Analyze demand forecast and measure supply chain performance for optimum capacity and capability
10. Identify risk throughout the supply chain
11. Evaluate options to minimize risk

12. Develop appropriate mitigation plans
13. Help your company reach its ideal supply chain state
14. Use data to link production, distribution, purchasing and service
15. Reduce waste in supply chains
16. Identify and classify supply chain risk and develop risk response plans
17. Improve communications throughout the supply chain

### **Topics Covered: (Body of Knowledge)**

Module 1: Supply Chains, Demand Management, and Forecasting

Module 2: Global Supply Chain Networks

Module 3: Sourcing Products and Services

Module 4: Internal Operations and Inventory

Module 5: Forward and Reverse Logistics

Module 6: Supply Chain Relationships

Module 7: Supply Chain Risk

Module 8: Optimization, Sustainability, and Technology

### **Certification Requirements**

To attain a certificate, attendees must pass the written examination, (earn a passing grade) in course assessments, and meet all prescribed professional requirements of attendance, participation, homework and learning objectives. Projects, class activities, workshop and brainstorming will be covered in the class. Homework is required.

Candidates must meet ONE of the following requirements:

Three years of supply chain experience

Bachelor's degree or in the international equivalent

CPIM, CLTD (includes APICS Fellows), CTL, CIRM, SCOR-P, CPM, or CPSM designation

### **Instructor**

The instructor will be a Certified CSCP with 15+ years' experience in industry.

### **What Our Students Say**

- ❖ "My experiences at your training facility were excellent. The instructors and fellow students made learning enjoyable. The guidance, support, and encouragement were great. I think the opportunity to go back to a class or the invitation to ask for help in a lean project in the future is an asset to your organization. The one-on-one mentoring and coaching are also a great feature."

### **Who Should Attend?**

Professionals who are looking to obtain the CSCP certification or enhancing knowledge in Supply Chain.
